300 WORDS

M.J. Harmony is a Slovenian New Age singer songwriter/ artist/ producer, that loves to create Mystical Ethereal music with World and Celtic influences, supported with channeled lyrics about Love, finding inner Strength, Freedom and Truth.

Being a Reiki practitioner, M.J. loves to implement Reiki healing energy into her compositions, which helps to calm and feed our Spirits with loving and lighter energy. Some even sense a bit of Elven Spirit inside the compositions.

Coming from a small town in a small country, she was always considered different by her peers and for these reasons she experienced bullying on a daily basis for over a decade. At a certain time her music was the only comfort and shoulder to cry on, and that's where she gained her Soulful singing skills with expressing a lot of emotions.

M.J. was a singer of many different bands, which didn't last for long and she had to figured out a way, how to create and share her music, even if that meant creating it on her own. So she learned to play different instruments and built her own recording studio in the attic.

So far she released a few singles, two albums and a musical trilogy.

Recently released album, Jeanne D' Arc, is a conceptual album, that talks about a Soul's Journey in this time and space called Life, finding her purpose, facing the obstacles and trials along the way, and eventually embracing the darkness and shadows that can occur and rising above them into the Light.

Musical trilogy, Path of the Soul, is part of the album and is a musical story, that really adds up to the whole concept of the album.

M.J. is currently working on building her brand and promoting her latest album and reaching to audience all around the globe.
